[recipient name was inserted here],

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Tom Yost

Subject: Telecom Regulations

Dear Chairman and Commissioners

In your upcoming decision regarding the 1996 Telecom Act, please allow me to voice my humble opinion. I will not be critical of Commission's work and decision of the 1996 Act, as I know it was done in earnest and I'm sure, based on information that the commission had to work with. However, I believe the concept and methods adopted for providing competition was flawed. It has proven to be a failure.

It is unreasonable to force a public company, i.e., Baby Bells to provide all of the investment and facilitate 100% of the operating costs to allow another entity the luxury of cherry picking customers, and without much investment at all. This is un-American. In addition, it really doesn't reduce the rates charged customers. Oh, maybe one could make arguments that it prevents rates from going up, but that won't fly either, as the State regulators have a say in that as well.

Please don't look at this as coming from a RBOC stockholder. Yes, I have owned the stocks of the regional Bells. I have also owned the AT&T and WorldCom stocks. In addition, I am a former employee of the original Bell System under the umbrella of AT&T before it was broken up. We can't go back and change that, I am only bringing attention to the fact that I am knowledgeable of the costs and investment required to bring the service to the customer's home or business.

The only fair method for bringing competition to telephone service is through the cable companies. The cable companies, like the telephone companies have invested in infrastructure and have a hard wire into the customer's premise. The technology is there to allow voice service over cable as well as broadband which they now provide. In return, allow the telephone companies to provide cable service which will help control the ever increasing rates charged for cable TV service. This is fair competition.

In summary, please consider eliminating the entire burden of investment on the regional telephone companies just for the sake of competition.

Sincerely,

Tom Geveden
